

IDROKEL MAGNESIO

UPPLEMENT AND CATALYST NUTRITIONAL FOR PLANT GROWTH AND VEGETAL METABOLISM

DESCRIPTION

This formulated is presented as a nutritional specialty to prevent and treat all physiopathologies caused by deficiencies of the element magnesium.

This formulated does not contain chlorides, sulfates and nitrates, in so far is a specific and exclusive prepared that use MAGNESIUM-EDTA.

This specialty born from the most recent research in the domain of nutrition and acts in harmony mode with the metabolism of plants, optimizing the potential productive of the plant without to creat stressful situations.

A product of ready use and is characterized by a pronounced sistemia of action can promote the absorption and translocation of the elements inside the tissues of the plant.

Above, the content of magnesium to ready effect, optimizes the activities photosynthetic, in so far the element magnesium is a central and fundamental component of the chlorophyll molecule.

The agronomic importance of magnesium is emerg especially in recent years, linked to biochemical phenomena more and more precise and detailed. In fact is essential for to have the maximum speed in many enzymatic reactions, particularly active mode almost all the enzymes related to metabolism of phosphorus and energy exchanges of cycle dell' ATP.

METHOD 'AND DOSAGE

Generally is apply for awayfoliar at doses of 50-100 gr. / HI.
and for fertigation at doses of 5-15 kg / ha.

repeating more times, in function of the cultivation needs..

*The doses given are the result of applied and calculated for distributions to normal volumes of water.
For the correct application in the specific climate, soil and crop, it is advisable to consult your service technician.
Respect the time of shortage.*

COMPOSITION

Oxide of Magnesium (MgO) soluble in water	2.0%
Chelated fraction	100.0%
Oxide of Magnesium (MgO) chelated by EDTA	30.0%

chelating agents: EDTA
Interval PH that ensures a good stability of the chelated fraction: 4-7

The methods of analysis not reported are internal methods of the manufacturer.
