

CHELAMIX BIO

Mixture of trace elements boron (B), copper (Cu), iron (Fe), manganese (Mn), molybdenum (Mo) and zinc (Zn)

DESCRIPTION

It is a formulated to based of chelated microelements with the addition of magnesium.

It is characterized by not being a mixture of individual compounds with a salt of magnesium, but is a fruit of a complex reaction of chelation in the liquid phase and subsequently concentrated.

Thanks to the high presence of chelated microelements from EDTA that provide maximum absorption and do not create antagonism between them, it improves the equilibrium state of the plant and the organoleptic characteristics of the fruit (flavor, size).
