

# FOLIAMIN SULPHUR

Solution of nitrogen fertilizer(S 50) with boron (B), copper (Cu), iron (Fe), manganese (Mn), molybdenum (Mo) and zinc (Zn)

## DESCRIPTION

Thanks to the presence of sulfur in the form of thiosulfate, presents the chemicals properties not found in similar products: activity reducing of the metals present in the soil making them available to the crop; a high content in sulfur which consent of lowers the pH in the area explored by the radical and salinity of the circulating solution, reduces the rate of carbonates, which would slow down the translation of the elements inside the plant, causing a aggrandizement the pH in the circle lymphatic; savings in used of iron chelates and finally even the availability of nitrogen acting on the processes of nitrification and urease, increasing the effectiveness of nitrogenous fertilizers.
