## Novaphos Kobber

Solution of fertilizer PK 15-9 with copper (Cu) at low content of chlorine

## DESCRIPTION

Is a liquid fertilizer that associates to the element copper from COPPER EDTA, phosphorus and potassium than in degree to enhance the absorption of all the nutritive elements contained in the formulation, but also those that are retained in the soil.

This particular mix of components together with an innovative manufacturing technique make it an increased activity nutritional physio that facilitates the absorption and sistemia in the plant, and in degree of stimulate the formation of new root and promote growth and protection of the radical apparatus.

And also is particularly useful as many times than environmental stress or pathological compromise the functionality of the radical system.

## **METHOD 'AND DOSAGE**

**TREATMENTS LEAF**: spray copious amounts of vegetation at the recommended doses of 200-100 gr / hl., Preferably in the more cool hours of the day. -

BRUSH TO BODY: for arboreal plants, using a 5% solution -

**IMMERSION OF ROOTS**: before transplantation, for herbaceous plants and trees, using a 0.25% solution -

**TREATMENTS RADICALS**: in general in the uses of fertigation lend themselves effectively, at a dose of 15-20 kg. / Ha. alone or in association with the chelates.

es, Organ-Mir

FERTILIZERS Organics, Liquids, Correctives, Idrosoluble

The doses given are the result of applied and calculated for distributions to normal volumes of water. For the correct application in the specific climate, soil and crop, it is advisable to consult your service technician. Respect the time of shortage.

## COMPOSITION

Phosphoric Anhydride ( $P_2O_5$ ) soluble in water	15.0%
Potassium oxide (K2O) soluble in water	9.0%
Copper (Cu) soluble in water	4.0%
Copper (Cu) chelated with EDTA	4.0%

Chelating agents: EDTA Interval of PH that ensures a good stability of the chelated fraction: 3-9

The methods of analysis not reported are internal methods of the manufacturer.
