

FOLIAMIN KS

SIMPLE MINERAL FERTILIZER

Solution of thiosulphate of potassium with boron (B), copper (Cu), iron (Fe), manganese (Mn), molybdenum (Mo), and zinc (Zn) with a low content of chlorine

DESCRIPTION

Is a formulated that enhances the function of the element potassium in particular phenological phases.

Has ability of to convey towards the organs of storage the protein substances, those oily and sugary substances.

In this way improves the organoleptic quality and the merchandise of the fruits (grapes and wine, stone fruit, pome fruit, vegetable, fruit, etc..). Indispensable when you want to balance the vegetative development of the crops for to focus activities towards the production of the flowers and fruits.

The product is also characterized for a strong reducing and acidifying activity releasing sulfur in the soil.

METHOD 'AND DOSAGE

The Foliamin KS typically applies for fertigation at doses of 30-50 kg / ha.

Suitable in all cultivation :

HORTICULTURAL (eggplant, pepper, zucchini, tomato, strawberry, salads)

TREES (citrus, olive, kiwi, apple, pear, grapes, peach, stone fruits,

INDUSTRIAL (cereals, sugar beet, corn, potatoes)

FLORAL and cultures, and **ORNAMENTAL NURSERIES**,

repeating more times, in function of the crops needs..

The doses given are the result of applied and calculated for distributions to normal volumes of water.

For the correct application in the specific climate, soil and crop, it is advisable to consult your service technician.

Respect the time of shortage.

COMPOSITION

Potassium oxide (K ₂ O) soluble in water.....	24.00%
Sulfur trioxide (SO ₃) soluble in water.....	41.00%
Sulfur trioxide (SO ₃) from thiosulfate soluble in water.....	37.90%
Boron (B) soluble in water	0.05%
Copper (Cu) soluble in water	0.01%
Copper (Cu) chelated with EDTA	0.01%
Iron (Fe) soluble in water.....	0.02%
Iron (Fe) chelated with EDTA	0.02%
Manganese (Mn) soluble in water.....	0.01%
Manganese (Mn) chelated with EDTA	0.01%
Molybdenum (Mo) soluble in water	0.005%
Zinc (Zn) soluble in water	0.02%
Zinc (Zn) chelated with EDTA	0.02%

chelating agents: EDTA

Interval of PH that ensures a good stability 'of the chelated fraction: 3-9

The methods of analysis not reported are internal methods of the manufacturer.
