

IDROPLANT 15-6-25

Fertilizer NPK(Mg) 06/25/15 (2) a low chlorine content obtained for mixing

DESCRIPTION

The high solubility and purity make it suitable for fertigation to hose, drip and sprinkler irrigation. The contribution of nitrogen and potassium, present in great quantities, promotes the phase productive of the plant, causing the stimulus to production.

The maturation is so advance, with increase of the sugary level and improvement of the natural color, in addition to determining a general stiffening of the final product.

The maturation is so advance, with increase in the sugary level and improvement of the natural color, in addition to determining a general stiffening of the final product.

METHOD 'AND DOSAGE

Typically applies for fertigation at doses of 80-120 kg / ha.
repeating more times, 2.3 times, in function of the crops needs.

*The doses given are the result of applied and calculated for distributions to normal volumes of water.
For the correct application in the specific climate, soil and crop, it is advisable to consult your service technician.
Respect the time of shortage.*

COMPOSITION

Total (N) Nitrogen	15.0%
Nitric (N) Nitrogen	7.5%
Ammonia (N) Nitrogen.....	7.5%
Phosphoric Anhydride (P ₂ O ₅) soluble in neutral ammonium citrate and in water	6.0%
Phosphoric Anhydride (P ₂ O ₅) soluble in neutral ammonium citrate and in water	6.0%
Potassium Oxide (K ₂ O) soluble in water	25.0%
Magnesium Oxide (MgO) soluble in water	2.0%

The methods of analysis not reported are internal methods of the manufacturer.
