

IDROPLANT EQUIFORT

DESCRIPTION

The high solubility and purity make it suitable for fertigation in hose, drip and sprinkler irrigation.

The contribution of nitrogen and potassium, which are present in great quantities, promotes the production phase of the plant, causing the stimulus to production.

The nutritional completeness is also constituted by the presence of all the microelements.

The effect is also to have a positive influence on the differentiation of flowers and buds, causing an anticipation of flowering, a general increase in production thus influencing the strength, appearance and quality of the fruit.

METHOD 'AND DOSAGE

Typically applies for fertigation at doses of 80-120 kg / ha repeating more times, in function of the crops needs.

*The doses given are the result of applied and calculated for distributions to normal volumes of water.
For the correct application in the specific climate, soil and crop, it is advisable to consult your service technician.
Respect the time of shortage.*

COMPOSITION

Total Nitrogen (N)	13.0%
Nitric Nitrogen (N).....	8.4%
Ammonia Nitrogen (N)	4.6%
Phosphoric Anhydride (P ₂ O ₅) soluble in neutral ammonium citrate and in water	6.0%
Phosphoric Anhydride (P ₂ O ₅) soluble in water	6.0%
Potassium Oxide (K ₂ O) soluble in water	30.0%
Magnesium Oxide (MgO) soluble in water	2.0%
Boron (B) soluble in water	0.05%
Copper (Cu) soluble in water.....	0.01%
Iron (Fe) soluble in water.....	0.02%
Manganese (Mn) soluble in water.....	0.01%
Molybdenum (Mo) soluble in water	0.005%
Zinc (Zn) soluble in water	0.01%

The methods of analysis not reported are internal methods of the manufacturer.
